

SHIVAM DUBEY

Hyderabad, Zip code 502319

☎ [+91-8897636093](tel:+91-8897636093) ✉ shivamdubey012@gmail.com in [LinkedIn](#) 🐙 [GitHub](#)

PROFESSIONAL SUMMARY

Data Engineer with 4 years of experience in PL/SQL development, ETL processes, and database optimization. Skilled in SQL, Python, PySpark, and AWS (S3, RDS, Redshift) with hands-on expertise in building and managing scalable data pipelines using Apache Airflow. Strong problem-solving and teamwork skills with a focus on delivering efficient, data-driven solutions.

EXPERIENCE

Application Development Analyst

July 2021 – Present

Accenture

Hyderabad

- Architected and optimized PL/SQL packages, stored procedures, triggers, views, and external tables, reducing data retrieval time by 50% and improving overall system efficiency by 30%.
- Streamlined SQL query performance by meticulously examining and optimizing SQL queries for Oracle databases, achieving significant efficiency gains in database operations.
- Developed, tested, and deployed high-performing database solutions to support large-scale enterprise applications and ensure reliability.
- Conducted comprehensive system integration testing (SIT) and regression testing for various change requests, ensuring seamless application functionality.
- Managed end-to-end JIRA processes, including gathering requirements, creating user stories, and overseeing ticket lifecycles.
- Contributed to ETL processes, enabling efficient data integration and migration across systems while maintaining data integrity.
- Designed and optimized SQL queries and developed Entity Relationship (ER) models for extracting, transforming, and loading data to support business intelligence needs.
- Collaborated with cross-functional teams to troubleshoot and resolve complex database issues, ensuring high availability and performance.
- Prepared detailed technical documentation, including process flows, data dictionaries, and deployment guides, ensuring clarity and maintainability.
- Mentored junior team members on PL/SQL best practices and database optimization techniques, fostering a culture of continuous learning.
- Supported database schema design and management, ensuring scalability and alignment with project requirements.

EDUCATION

Bachelor of Technology in Aeronautical Engineering

Graduated: 2021

MLR Institute of Technology

Hyderabad, CGPA: 7.4

Skills

Data Analysis/ Big Data: SQL, PL/SQL, PySpark,
Database Management and Cloud Data Warehousing: Oracle SQL, database design, Amazon Redshift
Data Visualization Tools: Power BI (including DAX)
Cloud DevOps: AWS (EC2, RDS, S3, Athena), Git, CI/CD
Testing Unit Testing, SIT, Regression
API Testing: SoapUI, RESTful API Validation
Programming Languages: Python
Operating Systems: UNIX
ETL Processes: Apache Airflow, Data stage, Data integration, migration
Tools and Technologies: Mainframe Emulator, JIRA, MS Suite
Domain Knowledge: Core Banking Systems, Networking Systems

CERTIFICATIONS

- Oracle Certified Foundations Associate – Oracle University, 2021
- Product Life Cycle Management – Tata Technologies, 2020
- Python for Data Science – IBM Developer Skills Network
- MATLAB Onramp – MathWorks

Projects

TSB Banco Sabadell - Capital and Impairment | Banking Domain,ETL,SQL, PL/SQL,Power BI

- Developed an application to calculate capital and impairment based on the bank's asset portfolio.
- Ensured data accuracy and efficiency through optimized SQL queries and database components. Achieved an 25% improvement in query execution times and a 20% reduction in system resource usage, contributing to more efficient data handling and reporting processes.

TSB Banco Sabadell - Securitization | Banking Domain,ETL,SQL, PL/SQL

- Designed and implemented views and procedures to evaluate capital adequacy and impairment metrics for the bank's asset portfolio in a securitization project. These enhancements significantly improved performance and accuracy by overall 15%.
- Performed system integration testing and regression testing, and created end reports for multiple change requests.
- Provide support to end-users, troubleshoot data-related issues, and ensure continuous data availability throughout the migration process.

National Broadband Network (ELMS) - Enterprise Location Management System (| ETL, AWS,Python,SQL, PL/SQL

- Designed and implemented stored procedures to handle bulk data manipulation, enabling efficient processing of large datasets with minimal downtime.
- Leveraged AWS CloudWatch to monitor and analyze log queries, ensuring real-time visibility and proactive resolution of performance issues. Utilized AWS Athena to perform serverless analysis on large-scale ELB log data stored in Amazon S3, optimizing query efficiency and reducing operational costs by implementing a pay-per-query model.
- Design data ingestion processes to extract data from diverse sources, leveraging AWS Glue for schema discovery and Amazon S3 as the storage solution.
- Collaborated with the DevOps team to integrate RDS snapshots into the disaster recovery plan, improving overall system reliability
- Utilize Amazon S3 as the intermediate storage for data transfoConfigured AWS RDS and EC2 instances to support seamless database migration, ensuring minimal downtime and data integrity.
- Architect data storage solutions in AWS, utilizing Amazon S3 for data lake storage and Amazon Athena for interactive querying
